

BROADBAND CONNECTION VOUCHER SCHEME

Bellcom Communications customers can obtain a grant of up to **£3,000** to upgrade your business to faster, better broadband through the ***Broadband Connection Vouchers scheme***.

The Government has invested £100 million into the scheme, administered by Broadband Delivery UK (BDUK), to provide grants to SMEs to upgrade their broadband connection to superfast or ultra-fast. It is part of the government's goal to drive growth and jobs, and help Britain's businesses succeed in international markets.

The scheme has been launched in **22 cities** across the UK. It is administered by the cities through registered suppliers.

It provides grants of **up to £3,000** to cover the capital and equipment costs of upgrading your broadband connection. You pay the VAT charged and the monthly line rental.

Benefits to your business as a result of faster, better broadband include:

Growing and accessing new markets through better communication with customers and suppliers

Increasing security through fast secure back-up of data

Increasing productivity and improving customer service through faster upload and download speeds

Upgrading your broadband will also help to future-proof your business for the digital challenges of tomorrow.

The scheme remains open for applications until 31 August 2018.

Boost your bottom line with a £3,000 grant to get superfast broadband for your business
